

Companies in the veterinary and animal feed sectors require qualified support for the development and approval of their products. KLIFOVET AG, part of the Argenta Group, is an internationally recognised provider of expert services in the veterinary medicine and animal feed sector based in Munich. We support our customers from the idea, through development, to approval and beyond. Service for our customers determines our actions. Founded in 1997, we are considered a global leader in animal health product development; Argenta and Klifovet have been awarded multiple times as the best service provider or the best contract research organisation in the animal health space internationally.

Like the animal health industry, Argenta including Klifovet is growing continuously.

To support our team we are currently seeking a:

Group Leader Clinical Studies (m/f/d) – Full-time

Your tasks:

- You are responsible for the budget, planning and execution of clinical studies at national/international level
- You prepare study protocols according to appropriate guidelines and customer requirements
- You ensure that the legal requirements for the respective study are fulfilled
- Selection/supervision of study sites (veterinarians, laboratories, universities, etc.) and ensuring the overall success of the various studies
- You are responsible for the coordination of the study execution, project controlling and continuous optimization of processes in order to achieve the agreed project goals in close collaboration with the clients and your team
- You work in close coordination with the data managers and statisticians and ensure that the data is correct collected and evaluated accordingly. You are also responsible for the preparation of the final report in which you are significantly involved
- You lead a team of approx. 5 employees

Your profile:

- Completed university studies in veterinary medicine or comparable scientific studies
- Ideally several years of professional experience in the field of drug regulatory affairs / clinical research or other relevant professional experience with leadership responsibilities
- Good knowledge of applicable regulatory requirements for clinical research
- Knowledge in project management, accurate and structured way of working, reliability and high sense of responsibility
- Very good analytical skills, assertiveness, flexibility and empathy
- Good team and communication skills as well as a confident and positive appearance towards our customers and partners
- Be able to familiarize yourself with new tasks and areas of knowledge
- Very good English and German language skills, both written and spoken
- Willingness to travel on business up to 30% of working time

We offer you a detailed introduction to your field of work, independent, challenging and diverse work, modern work equipment, family-friendly working hours, regular training and further education and a positive and collegial team in an appealing atmosphere in Munich.

Please send your complete application including salary expectations and a possible starting date to KLIFOVET AG, Ms. Barbara Riedl, Geyerspergerstr. 27, 80689 Munich, jobs@klifovet.com.
